Paul Bouchier: GOLD STAR for Jon for showing a newly-built balancing robot, produced in 2 weeks!

00:09:16.487,00:09:19.487

Jim F - CalgaryAB: @ Everyone. Thanks for the help and inspiration. @Paul @Jon @Harold etc al.

00:24:18.705,00:24:21.705

Jim F - CalgaryAB: @DougP et. al.

00:37:18.107,00:37:21.107

Ponder SomeMore: 1. how many robots have you started?

2. how many robots have you completed?

3. have you lost count of both categories?

I wonder what statistical analysis of these questions alone would reveal about a roboticists' population.

00:44:08.822,00:44:11.822

Ponder SomeMore: Yeah, that's another question. How many parts have you bought and never used?

00:44:39.662,00:44:42.662

Ray Casler: 100s, 1000s...

00:45:06.004,00:45:09.004

Ponder SomeMore: it's a disease

00:45:44.720,00:45:47.720

Ray Casler: Suzan Powder - stop the insanity!!!

00:53:54.208,00:53:57.208

Paul Bouchier: Ray showed the ESP32 Cheap Yellow Display, which is a largish (2.8") touchscreen LCD. Can use ESP-NOW. Has an SD card for data storage

01:02:10.823,01:02:13.823

Paul Bouchier: Gotta go

Mickey Dean: weighted wheels and axles if Iirc

01:39:21.518,01:39:24.518

Mickey Dean: you likely will want a 1:10 at least

01:39:43.057,01:39:46.057

Mickey Dean: 1:8 or 1:6 would be better but more expensive

01:40:54.812,01:40:57.812

Mickey Dean: the biggest issue is getting encoders on them, sometimes the placement makes it difficult

01:42:13.050,01:42:16.050

Mickey Dean: Jon, and replace broken parts

01:45:00.598,01:45:03.598

Mickey Dean: Jon, do you have pics of your encoder idea you could share in discord sometime?
